Correction to the descition below. AECOM indicated they do not need EPA aproval to move to alt 1 at SG-B042 per recent changes to the FSP.

Thanks,
Julee

Sean,

Find attached photos near RM2.8E.

1st photo: SG-S020 is under the barge and the adjacent dolphins. The closest access to the target location is abot 70+ FT from it per Gravity measurement.

2nd photo: SG-B042 attempted but sticks and cobbles caused washout of black sands with a layer of ash/clay. This location was within about 100 ft a concrete lined channel discharging a rusty looking water. (Shown in 2nd and 3rd photos). This location is planned to be requested for relocation to alt 1.

4th photo: SG-S019 sampled in 25 FT radius up next to barge, which covered about half of the 25 ft radius area.

Thank you
Julee

Subject: Re: Portland Harbor Surface Sediment Sampling

There is some hesitancy to access port of portland property near RM 8.7 due to navy fencing and signage for restricted area with use of force authorized. See attached photos.

Sean and Davis,

Find attached photos of sampling efforts today.

1st & 2nd photos: trace sheen observed at SG-B117 (RM4.6E slip)

3rd photo: lowering sampler at SG-B289 (RM8.6E)

Thank you,

Julee
